

ABOUT US

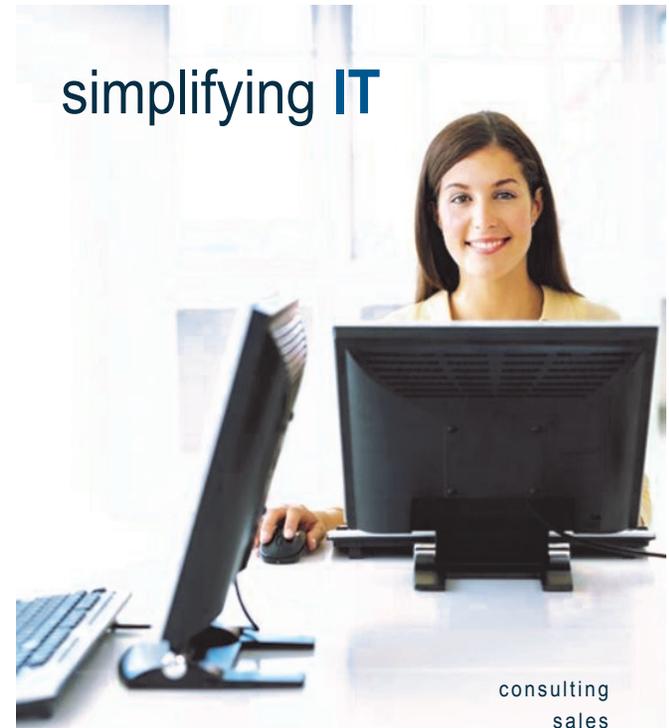

A premier provider of IT consulting and support services, MJM IT Solutions has become the full service IT department of choice for professionals and small businesses across the Twin Cities.

Our core clients are companies that range from five to one hundred employees, spanning various industries such as healthcare, non-profit, manufacturing, finance, retail wholesale, and professional services. Although each client conducts business differently, they all require their technology platform to be as reliable and secure as possible in order to support their strategic goals.

MJM IT Solutions was founded on the simple principle that smaller businesses need IT services and solutions just as much as big companies, but they often can't justify the expense of a dedicated IT department. With MJM as their IT partner, our customers are able to focus their energy and resources on growing their business as well as their bottom line while utilizing the technology they need to compete and succeed in today's fast paced, rapidly changing environment.

MJM is dedicated to delivering customized, scalable and business-driven solutions so you can be more productive, competitive and profitable.

mjm IT SOLUTIONS

SMALL BUSINESS SUPPORT SPECIALISTS

IT solutions that work for your business.

DELIVERING RELIABLE, SECURE ENVIRONMENTS

If something has gone wrong and its not clear who you should call, our on-demand support offers the solution you've been looking for. We'll quickly diagnose the problem, develop a solution and get your business back up and running fast.

flexible solutions for your business needs

IT ON DEMAND

Our highly qualified technical consultants are ready to provide you with fast help no matter what problem has arisen with your IT infrastructure. This "pay as you go" support is available without a contract on a simple fee for service basis. This keeps your costs low and your results predictable: you receive quick, effective desktop or network support problem resolution at a reasonable price, with a personal touch you'll value.

SMALL BUSINESS SPECIALISTS

Our services are targeted to let you offload routine, but vital infrastructure monitoring and management functions so you can concentrate on your business. MJM can function as an extension of your business, providing proactive services that help prevent problems before they happen and fix them quickly and effectively when they do happen—minimizing the impact on your business operations.

IT SUPPORT SOLUTIONS

- ON DEMAND SERVICES
- MANAGED INFRASTRUCTURE
- VIRTUALIZATION
- WEB SOLUTIONS

MANAGED SOLUTIONS

Our talented support team will set up and manage the infrastructure, monitor its lifecycle and handle all daily operations without hassling you. We'll let you know how things are going and address any issues that come up.

WEB SOLUTIONS

Don't let an outdated web site give your customers the wrong impression. Focus on growing your business and let us take care of updating your site to keep it relevant in today's competitive market.

VIRTUALIZATION SOLUTIONS

Future proof your infrastructure, cut costs, increase operational flexibility and deliver essential business requirements more effectively. Virtualization is a powerful technology that businesses can no longer afford to ignore.

WE WORK WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
